Why Should You Switch Your Pool or Spa to Enzymes?

Many people say it is impossible to have a spa or pool and not add chemicals.

There are many reasons why you should consider switching your spa or pool from chemicals to all natural enzymes. With Omega's spa and pool treatments you'll cut your maintenance to twice a month and the products from many to one, saving you money.

Omega's spa and pool treatments will cut your costs of treating your spa in half and not leave your equipment vulnerable to expensive repairs. Treating your spa or pool will be less expensive than ever. Depending on the size of your spa or pool the savings can be huge.

Why should you switch your spa or pool to Omega's spa and pool treatments?

After you purchased your spa or pool did you feel like you needed to take chemistry 101? Test this, test that, add this and that, but don't add this with that.

At the end of the day some people begin to wonder if they made the right decision when they bought a spa or pool.

Omega's spa and pool treatments are safe for your family, your wallet, and is also safe for the environment. You can backwash your filter right onto the lawn or other vegetation.

How do you open and close a pool?

When you open your pool or start the enzymes for the first time you add 2 ounces per 10,000 gallons of water the first and second week. Then you skip week three and add 1 ounce per 10,000 gallons every other week during the season, (week 4, 6, 8, etc...). As you get ready to close your pool, you add 2 ounces per 10,000 gallons the last two weeks then close the pool.

Omega's spa and pool treatments will turn your spa or pool care from confusion to simple overnight. The first thing you will notice is that instead of this little tote full of products for your spa, we have one bottle, (if you have high PH and hard water you will need to adjust your PH). Instead of checking your spa or pool once, twice or even three times a WEEK, you need only check your spa twice a MONTH. Like changing water? Instead of two to six times a year we recommend changing your water once a year. Need more reasons?

With Omega's spa and pool treatments:

- * Pumps, heaters, and jets will last longer
- * Pillows and covers will not deteriorate as fast
- * No more gaseous bubbles to breathe
- * Your skin and hair will stay soft, smooth, and shiny
- * The surface of your spa will stay squeaky clean
- * Your bathing suit, (if you use one), will last much longer
